

SFIBRAL

FIBER CEMENT PANELS

Functional and efficient solution for rear ventilated facade

Made in
Austria

Most RAL and
NCS colors

Gray base & through
coloured panels

Functional and efficient

SFIBRAL is a fiber cement panel for a functional and efficient rear ventilated façade.

SFIBRAL GRAY (gray base) and SFIBRAL COLOR (through coloured) panels are coated with a double impermeable layer of acrylic and hydrophobic (water-resistant) coating, which gives the panels an even and smooth surface.

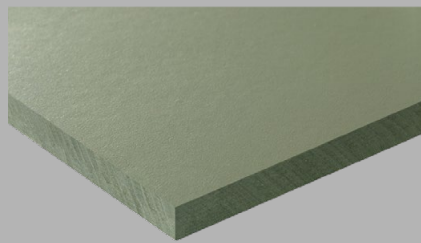

SFIBRAL STRUCTURE (gray base) panels have a rough, structural surface.

All SFIBRAL panels are air cured (not autoclaved) and can be coated in most RAL and NCS colors, which allows the cost-effective and efficient implementation of the architectural vision of the building.

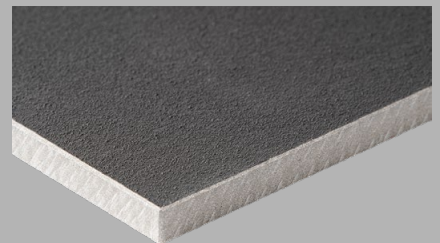

SFIBRAL GRAY

SFIBRAL Color

SFIBRAL STRUCTURE

SFIBRAL panel sizes

Factory panel sizes: 3070 x 1270 mm / 2530 x 1270 mm

Trimmed panel sizes: 3050 x 1250 mm / 2510 x 1250 mm

SFIBRAL GRAY

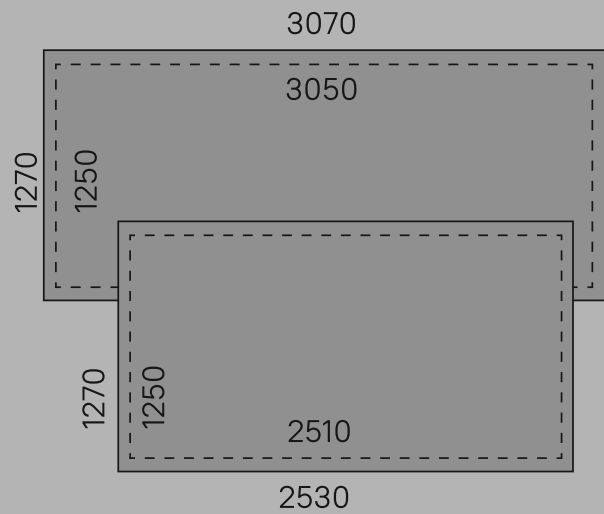

Available in 6/8 mm thickness (only trimmed)

SFIBRAL STRUCTURE

Available in 8 mm thickness (only trimmed)

SFIBRAL COLOR

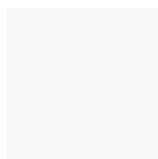

Available in 8 mm thickness (trimmed / untrimmed)

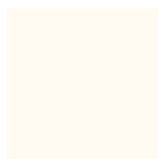

Technical characteristics and physical properties according to standard EN 12467

	SFIBRAL GRAY	SFIBRAL STRUCTURE	SFIBRAL Color
Thickness	8 / 6 mm	8 mm	8 mm
Weight (kg)	8mm - 15.6 6mm - 11.7	15.6	15.6
Density (g / cm ³)	≥1.65	≥1.65	≥1.65
Transverse / longitudinal bending resistance (Mpa)	20/28	20/28	15.9 / 22.2
Compressive strength (Mpa)	40	40	40
Young's modulus (Mpa)	15000	15000	15000
Water absorption (%)	14	14	14
Temperature resistance (° C)	-60/+80	-60/+80	-60/+80
Mechanical resistance	Class 4	Class 4	Class 4
Classification of the board according to EN 12467	NT A4 I	NT A4 I	NT A4 I
Fire resistance class	A2-S1, d0	A2-S1, d0	A2-S1, d0
